DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 10-18, 28-40, drawn to a first method of regulating methanol in a fuel cell, classified in class 429, subclass 23.
 - II. Claims 41-44, drawn to a second method of regulating methanol in a fuel cell, classified in class 429, subclass 13.
2. The inventions are distinct, each from the other because of the following reasons: Group II requires a diffusion layer, which layer is compressed or decompressed and this layer is not part of the Group I method. In addition, Group I includes a concentration regulator, an element not encompassed by the Group II method.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on Monday-Thursday from 6:15-3:45.
